

MASTER MINING

TORONTO, CANADA

Understanding the Mining Industry: From A to Z

Master the complex world of mining in a modern and interactive course that builds an understanding of the mining industry and investments.

March 2-4, 2017 • Toronto, Ontario, Canada (prior to PDAC)

COURSE OVERVIEW

UNDERSTANDING THE MINING INDUSTRY: FROM A TO Z

Day 1: INTRODUCTION TO MINING

(mine life stages, exploration, mining studies, the mining process, design and planning, quantification and interpretation, extraction and processing, rehabilitation)

Day 2: THE ECONOMICS OF MINING

(operations into economics, exploration expenditure, determining capital requirements, mining equipment options, economic evaluation)

Day 3: FINANCING AND DEAL-MAKING

(raising funds and financial instruments, equity investments, debt and project finance, joint ventures, marketing and off-take agreements, technical report and media release interpretation)

COURSE INSTRUCTOR

YOUR CLASS LEADER is Dr. Willem Smuts, a geologist with a Masters degree in sedimentology from the University of Port Elizabeth (1987) and a Ph.D. from Pretoria University (1998) on the origins of coal. He is a registered professional earth scientist and has authored and co-authored over 79 scientific and technical papers. Willem has 27 years of technical and management experience in the fields of research, exploration, mining and consulting. He has edited several leading mining magazines, independently consults on coal, gold and base metals exploration and has been delivering hands-on mining courses and workshops for companies and individuals around the globe.
